

Dangerous Goods Statement

Kuehne+Nagel is committed to the safe and secure handling and transportation of Dangerous Goods.

We achieve this by applying the ICAO Technical Instructions for the Safe Transport of Dangerous Goods by (Air), the IMDG (Sea), ADR (Road), RID (Rail) code, and all other applicable National Dangerous Goods regulations.

The primary principles of our Dangerous Goods Management System are:

- Complying with all applicable regulations and our customer's specific requirements.
- We continuously monitor national and international Dangerous Goods Regulations and incorporate new industry standards and best practices.
- Training our Dangerous Goods Experts to oversee all dangerous goods activities and providing awareness training to all staff involved with hazardous materials.
- Utilizing our company-owned DG Info Tool application to monitor staff rotations and training requirements.
- Encouraging staff to report all dangerous goods incidents and near-misses proactively and conducting root cause analyses to identify underlying issues.
- Having a qualified expert review each Dangerous Goods shipment in accordance with our internal procedures.
- Focus on and develop new DG services for our customers.

As a leading logistics provider, our focus on safety, compliance, and continuous improvement makes us the best choice for businesses seeking a reliable and secure logistics partner for Dangerous Goods.

Kuehne+Nagel International AG, July 2023
