# Chartering

Boost your project with safe and efficient transport for your heavy-lift and oversized cargo.

# Chartering

## Are you looking for a customised chartering solution to a remote location for your non-standard size cargo?

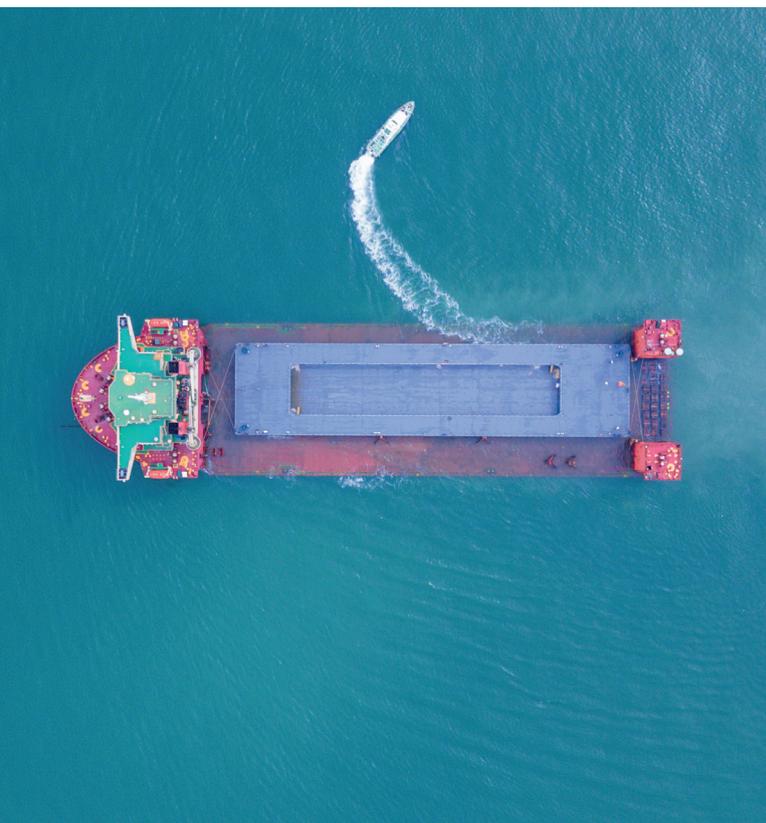

### Chartering solution for your cargo

Transporting cargo safely and efficiently to remote locations is not an easy process – especially when it comes to oversized and heavy-lift shipments. Kuehne+Nagel's Project Logistics chartering team assists customers in sourcing the right vessel to match the special requirements of the cargo. No matter how complicated your project is, whether it is industrial, heavy lift or breakbulk cargo – our teams can support you. Our dedicated chartering experts find the most flexible solution for any location worldwide to ensure the transport runs efficiently, smoothly and on time. Our chartering team assists you with customised solutions for your requirements with the highest operating standards. Our in-house consultancy deals with all legal aspects and takes care of the technical planning. You will benefit from our longstanding relationships with major heavy-lift carriers and from our in-house engineering services with advanced transport, lifting and lashing solutions.

### Individual solutions for every shipment

Chartering services are a key factor in many project logistics supply chains and execution phases. Sourcing the right vessel for your oversized, highly valuable equipment is essential to ensure you meet the delivery time and stay on budget. The Kuehne+Nagel Project Logistics chartering team develops custom-made, quality-driven strategies that ensure the right delivery for your cargo, such as project-specific voyages, time charter of vessels, supply boats, barges or landing crafts.

At Kuehne+Nagel, we combine decades of experience in breakbulk and heavy-lift chartering with in-depth project freight forwarding expertise and in-house engineering competence. Through our global network we are able to select the safest and most efficient shipping option for your cargo and provide competitive and reliable quotes in a timely manner.

### Take advantage of our services:

- Long-standing in-house chartering operations expertise
- Technical consultation
- Selection of suitable vessel type, based on the requirements set by you and the cargo
- Support with customised loading and cargo stowage plans
- Lifting and lashing calculations
- Voyage/journey management
- Post fixing support
- Risk mitigation through due diligence and compliance review of the carrier portfolio

## Reducing CO2 emissions in project logistics

Today, the logistics industry contributes to about 8% of global CO2 emissions. Project logistics often requires a combination of different transport solutions, which can further increase the carbon footprint of a project. With the launch of its zero carbon goals, Kuehne+Nagel has committed to reducing CO2 contribution and offering customised, environmentally friendly and sustainable supply chain solutions to our customers. Leveraging our digital platforms, Kuehne+Nagel can work with you to optimise your choice of transport routes and means, to build sustainable supply chains.

## Health, Safety and Environment policy

At Kuehne+Nagel, we provide the highest standards of Health, Safety and Environment (HSE) management at all times. We minimise accidents or workplace-related illnesses by implementing HSE management and quality assurance at all levels and through mandatory training. This applies not only to our employees, but also to everyone working on our premises, our business partners, customers, and the environments in which we operate. Using our web-based HSE tool enables immediate actions and clear insight into operations from an HSE perspective. Our standards are compliant with the common global certifications: ISO 9001 (Quality), ISO 14001 (Environment) and ISO 45001 (Safety & Health). All our employees and customers have access to our HSE tool and can report incidents, unsafe conditions, as well as positive observations.

# Project Logistics

## Your benefits:

- Expertise in charter contracts
- Vessel determination for any assignment
- Global 24/7 access to dedicated chartering experts in strategic key locations
- Full and real-time visibility across time zones
- Direct contacts to all major and niche carriers
- Coordination of shipments from other countries
- Diligent charter agreement management and post-fixture support
- Highest standards in HSE (Health, Safety and Environment)
