

Project Logistics

# Marine Logistics

Reliable and cost-efficient logistics solutions for your vessels, delivered quickly to any location in the world.

# Marine Logistics

Are you looking for an experienced partner worldwide to provide you with fast, safe and efficient supply chain solutions in marine logistics and for your fleet?

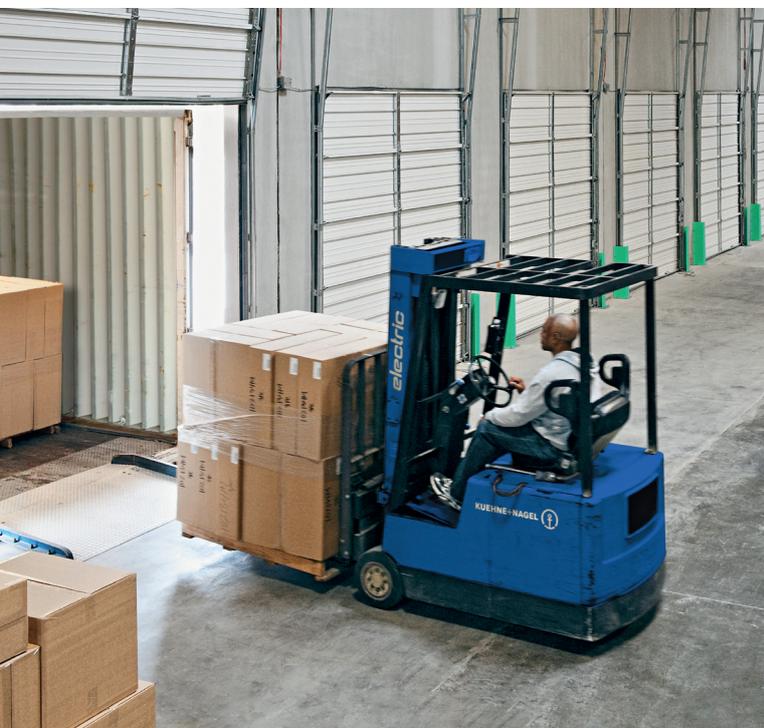

## Logistic solutions for maritime industry

As supplies for your vessels are sourced globally, procuring them for your vessels is challenging and time-consuming. While purchasing these parts, you might not know the shipping schedules or they may change without prior notice. Various other factors like different suppliers, changing cargo flows and multimodal transport requirements make your supply chains even more complex. Whether you are a ship owner, a ship management company, or an industrial supplier, controlling and managing such complicated supply chains requires a global network of trusted partners. With our

expertise and a large network of strategic partners worldwide, the Kuehne+Nagel marine logistics team focuses on providing cost-effective and reliable logistics solutions to the maritime industry for all modes of transport. Our experts offer a wide range of solutions that can be tailored to your company's specific needs. We use the strength of our global network of specialists to optimise your logistics from the purchase order is placed to on-board delivery. Due to the complex nature of maritime supply chains, we strive to find areas for improvement at every step of the journey, so that you can focus on growing your core business.

## Health, Safety and Environment policy

At Kuehne+Nagel, we provide the highest standards of Health, Safety and Environment (HSE) management at all times. We minimise accidents or workplace-related illnesses by implementing HSE management and quality assurance at all levels and through mandatory training. This applies not only to our employees, but also to everyone working on our premises, our business partners, customers, and the environments in which we operate. Using our web-based HSE tool enables immediate actions and clear insight into operations from an HSE perspective. Our standards are compliant with the common global certifications: ISO 9001 (Quality), ISO 14001 (Environment) and ISO 45001 (Safety & Health). All our employees and customers have access to our HSE tool and can report incidents, unsafe conditions, as well as positive observations.

## Take advantage of our services:

- Cargo consolidation, handling and warehousing
- Air, sea, and road logistics solutions to the destination with fast track handling
- Dangerous goods management
- Last mile delivery in key locations around the globe
- Customs clearance and consulting
- Risk management and insurance programme
- EDI integration with Enterprise Resource Planning (ERP) and Warehouse Management System (WMS)
- 24/7 live tracking on orders, shipments and services
- Global stock/inventory control and reporting
- Sustainable transport solutions and visibility on CO2 emissions

## Full visibility of your supply chain

In marine logistics, our operating model is driven and supported by the online platform One Global System (OGS). It is designed to meet the needs of your industry and provide full control of your supply chain with analytics and budget reporting. From planning to delivery, OGS gives you global coverage and visibility to manage your entire supply chain. The software supports both inbound and outbound electronic data interchange (EDI) at every stage

of the supply process, ensuring full transparency. Further to this, the system provides you with master data on the full supply chain, enabling cost and performance optimisation. OGS manages our hubs, and creates reliable transit stations with order and supplier management, ensuring that order consolidations are shipped as efficient as possible. It is a responsive application, meaning you can access it from any device and get up-to-date insights from anywhere in the world.

## Agency support

Kuehne+Nagel offers a comprehensive modern supply service for the offshore and shipping industry. With our strategically located hubs as well as our network of sub-agents, we offer a full agency service in key locations for major markets. We assist with the temporary and permanent import of vessels, including ship crewing and supply management.

### Industry focus:

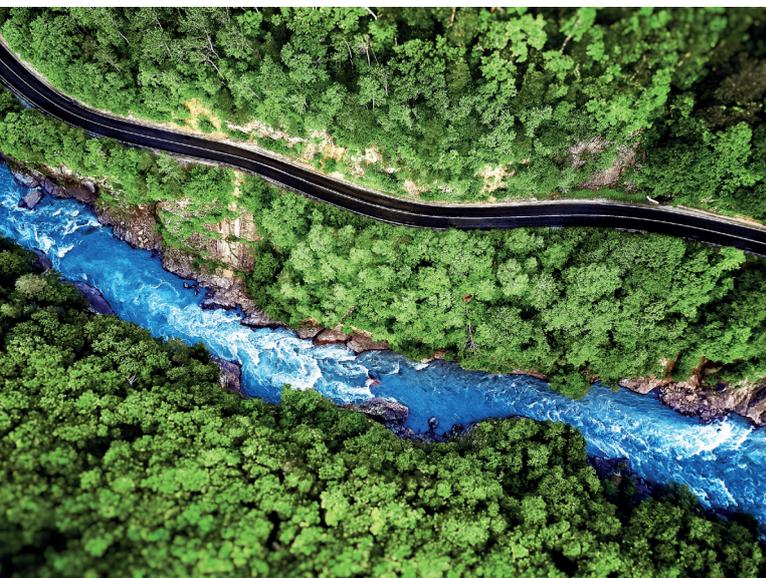

- Ship spares
- Ship owners
- Ship management companies
- Ship yards
- Cruise lines

## Support for yard and dock projects

Our marine logistics experts develop customised solutions for you. For example, if you need support in planning and executing maintenance and repair work, or for more specialised projects such as the conversion or retrofitting of seagoing vessels,

our specialists will systematically take care of the entire process to ensure a full cost overview for the docking. We further support our customers with “on-site” personnel. For shipyard projects that require a quick response, our dedicated teams provide individual support at short notice to ensure safe, fast and smooth operations.

## Reducing CO2 emissions in project logistics

Today, the logistics industry contributes to about 8% of global CO2 emissions. Project logistics often requires a combination of different transport solutions, which can further increase the carbon footprint of a project. With the launch of its zero carbon goals, Kuehne+Nagel has committed to reducing CO2 contribution and offering customised, environmentally friendly and sustainable supply chain solutions to our customers. Leveraging our digital platforms, Kuehne+Nagel can work with you to optimise your choice of transport routes and means, to build sustainable supply chains.

# Project Logistics

## Your benefits:

- Highest standards in Health, Safety and Environment (HSE)
- Global coverage in strategic core locations
- 24/7 emergency service worldwide
- Full transparency and control via OGS – the in-house IT software
- Oversized and heavy-lift shipments
- A global network of project experts
- Cargo damage risk prevention
- Vendor management
