Environmental Targets 2020 & Performance 2014
Overview of current status

Schindellegi, May 2015
The focus of the Environmental Targets 2020 is to reduce our global footprint

- **CO2**: 15% reduction in CO2 from KN sites* per FTE and per 100m²
  - CO2 from KN sites* will be reduced by 15% per FTE and per 100m²

- **Fuel**: 1% improvement in fuel intensity each year
  - KN will improve 1% in fuel intensity each year

- **Electricity**: 10% usage of electricity from low carbon sources will reach 10%
  - Usage of electricity from low carbon sources will reach 10%

- **ISO 14001**: 100% facilities with ISO 14001 certification or certification renewals
  - 100% facilities with ISO 14001 certification or certification renewals

- **Recycling**: 75% increase in recycling to 75% as a percentage of all waste
  - KN will increase recycling to 75% as a percentage of all waste

---

*Site = defined as a KN location having at least 15 persons employed and/or an area > 800 m²

*Facilities also need Management approval to be ISO 14001
The Environmental Performance continuously improved since the baseline 2010

- Low carbon energy increased 6%
- ISO 14001: 392
- Recycling rate 72%

- Low carbon energy increased 2%
- ISO 14001 facilities: 285
- Recycling rate 52%

- Energy consumption: 540 Mio kWh
- ISO 14001 facilities: 210
- Waste to landfill: 2,858,849 tons

2010 (Baseline)
2012
2014

*Annual performance vs. Baseline (based on absolute figures)*
The Environmental Performance continuously improved since the baseline 2010

CO₂ per FTE has been consistently reduced

CO₂ per 100m has been consistently reduced
